

HIBA BELGHITH

Data Engineer • 3-5 Years Experience • CDI / CDD

Phone	+216 XX XXX XXX
Email	hiba.belghith@email.com
Location	Tunis / Ben Arous, Tunisia
Domains	Data Engineering • Big Data • ETL
Experience Level	Mid-Level / Confirmed
Experience	3-5 years

Professional Profile

Data Engineer with strong experience in designing, developing, and maintaining scalable data pipelines and ETL workflows. Skilled in Python, SQL, Apache Spark, and Apache Airflow for processing large-scale datasets and automating data operations. Experienced in building reliable data architectures, optimizing database performance, and supporting analytics and machine learning teams with clean and structured data. Passionate about big data technologies, cloud infrastructure, automation, and delivering efficient data solutions in Agile and collaborative environments.

Technical Skills

- Python for Data Engineering
- SQL & Database Optimization
- Apache Spark
- Apache Airflow
- ETL / ELT Pipelines
- Data Warehousing
- Big Data Processing
- Cloud & Distributed Systems
- Data Cleaning & Transformation
- Git & Version Control

Professional Experience

Data Engineer

IT Company / Data Platform – Tunis

Period: 3-5 years of experience

- Developed and maintained scalable ETL pipelines.
- Processed large datasets using Apache Spark.
- Automated workflows and scheduling with Apache Airflow.
- Optimized SQL queries and database performance.
- Collaborated with analytics and AI teams to provide reliable datasets.
- Participated in data infrastructure and cloud integration projects.

Education

Engineering Degree / Master's in Computer Science, Data Engineering or Big Data

University or Engineering School – Tunisia

Tools & Technologies

- Python
- SQL
- Apache Spark
- Apache Airflow
- PostgreSQL / MySQL
- Docker
- Git / GitHub
- Linux
- ETL Pipelines
- Cloud Basics

Professional Objective

Join a data-driven company as a Data Engineer to contribute to scalable data platforms, optimize ETL processes, and support advanced analytics and AI initiatives through reliable and high-performance data engineering solutions.
