Location	Tunis / Ben Arous, Tunisia
Domains	DevOps • Cloud • Infrastructure
Experience Level	Mid-Level / Confirmed
Experience	3-5 years

Professional Profile

DevOps Engineer with 3 to 5 years of experience in cloud infrastructure, automation, CI/CD pipelines, and scalable deployment environments. Experienced in containerization technologies, infrastructure as code, cloud services, and automation workflows. Strong expertise with Docker, Kubernetes, Terraform, AWS, CI/CD pipelines, and GitHub Actions. Skilled in improving deployment reliability, optimizing infrastructure performance, and collaborating with development teams in Agile environments. Passionate about automation, scalability, security, and continuous improvement of cloud-native systems and operational workflows.

Technical Skills

- Docker & Containerization
- Kubernetes Administration
- Terraform & Infrastructure as Code
- AWS Cloud Services
- CI/CD Pipelines
- GitHub Actions
- Linux Administration
- Monitoring & Logging
- Automation & Scripting
- Git / Version Control

Professional Experience

DevOps Engineer

IT Company / Cloud Environment – Tunis

Period: 3-5 years of experience

- Designed and maintained automated CI/CD pipelines.
- Managed Kubernetes clusters and Docker-based deployments.
- Automated cloud infrastructure provisioning using Terraform.
- Worked with AWS services for scalable infrastructure management.
- Improved deployment performance and operational reliability.
- Collaborated with software engineering and infrastructure teams.

Education

Engineering Degree / Master's in Computer Science or Cloud Computing

University or Engineering School – Tunisia

Tools & Technologies

- Docker
- Kubernetes
- Terraform
- AWS
- GitHub Actions
- Jenkins
- Linux
- Git / GitHub
- Prometheus / Grafana
- Shell Scripting

Professional Objective

Join a modern and innovative company as a DevOps Engineer to contribute to scalable cloud infrastructure, deployment automation, infrastructure reliability, and continuous delivery processes while supporting high-performance engineering teams.
